**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Standard Bidding Document (SBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

**REPUBLIC OF SOUTH AFRICA**

## **TERMS OF REFERENCE**

### **REQUEST FOR PROPOSAL**

**TERMS OF REFERENCE FOR THE PROCUREMENT,  
IMPLEMENTATION, CONFIGURATION, MAINTENANCE AND SUPPORT  
OF CONVERGENCE TOOL**

## **TERMS OF REFERENCE (TOR)**

### **TERMS OF REFERENCE FOR THE PROCUREMENT, IMPLEMENTATION, CONFIGURATION, MAINTENANCE AND SUPPORT OF CONVERGENCE TOOL**

#### **1 PURPOSE**

- 1.1 The purpose of this is to request a proposal for procurement, implementation, configuration, maintenance and support of convergence tool.

#### **2 PROJECT NAME**

- 2.1 Convergence Integration System, abbreviated as CIS.

#### **3 BACKGROUND**

- 3.1 The distribution and access of social services remains skewed horizontally and vertically within the government, therefore the access of social protection services to poor and vulnerable communities is crucial. This is aggravated by lack of a platform that can assist in pulling and pushing data from different data sources from whatever technology platform data might be.
- 3.2 One of the government strategies talks of a comprehensive social protection system focusing on a minimum standard which is linked to a social wage or a social floor. The Department of Social Development is leading this strategy. Currently some departments/ stakeholders have automated their respective core processes which contributes on towards comprehensive social protection system. This automation is running silo on different technology stack.
- 3.3 DSD intends to integrate all existing data sets to enable the information exchange with other Government Departments. DSD has an integrated case management solution called Social Development Integrated Case Management System (SDICMS) which is built on Microsoft ASP.NET and database based on SQL 2008 R2 and also has other silo systems which are also on Microsoft platform. Other DSD provincial systems are not on Microsoft technology.
- 3.4 National DSD provide system/s that are implemented throughout the country by either DSD officials or citizen.

## **4 PROBLEM STATEMENT AND CURRENT SITUATION**

### **4.1 Problem Statement**

4.1.1 The NDP 2030 advocates for the improvement of the lives of poor and vulnerable communities, families and especially children. The MTSF outlines in Outcome 13 the development and implementation of an integrated social protection information system that will promote the sharing of data and uniform reporting throughout the government to enhance services to poor and vulnerable communities and families.

4.1.2 This will address a number of challenges related to social protection intervention i.e. such as over and under reporting; discrepancies in terms of reporting; fragmentation and misalignment of information; poor and vulnerable people falling through the cracks and not accessing interventions; departments maintains their own database of poor beneficiaries with limited information sharing on poor and vulnerable citizens which is also not updated regularly.

4.1.3 A key solution is to have an integrated view of the entire social protection system across government this will be an excellent tool for improved services and interventions, whereby real time quality data will be stored centrally and accessed throughout government.

### **4.2 Current Situation**

4.2.1 Government departments have invested on technology regarding the automation of services that are rendered to the public. However, the automation has been taking place at individual department levels and not at a Government-Wide level, this has resulted in many parallel systems that are not complementing each other albeit sharing the same client information in some cases.

- 4.2.2 Currently silo systems across government on social protection interventions leads to duplications, insufficient tracking, monitoring and reporting which aggravate inadequate benefits for poor and vulnerable citizens.
- 4.2.3 Currently social protection operates with delivery gaps created by silo systems which has client data, lack of enterprise content taxonomy, unverified data by third parties, and unstructured engagements with citizens across government. It will be beneficial for government to have real time quality data on accessing of services and to improve the social protection targeting.

## 5 SCOPE OF WORK

- In order to ensure that all problems are addressed, it is recommended that a fully functional convergence tool is procured, implemented, configured and maintained.
- A successful bidder will have to comply to all the requirements as listed in this section of the document. It is envisioned that a successful bidder will engage in a full contract with the DSD.
- A detailed Service Level Agreement (SLA) will be required for a period of no longer than 36 months. For evaluation purposes a Next Business Day (NBD) response will be required in the bidder's proposal.
- Project Management services will be provided by the successful bidder for the duration of the project. All project management deliverables will be included for the total duration of the project.

### 5.1 Functional Requirements

All functional requirements are seen as mandatory for the proposal. Where applicable specific sub-areas will be listed that will be needed for the successful completion of this project.

- 5.1.1 The bidder is to demonstrate its ability to monitor an orchestrated convergence layer end to end.
- 5.1.2 Develop a comprehensive data dictionary and monitoring and evaluation framework for core DSD processes.
- 5.1.3 Develop Information Control Document (ICD) for identified integration messages between departments at any point in time.
- 5.1.4 The bidder is to provide details around its capabilities to monitor end to end real data as well as the creation and monitoring of end user transactions.
- 5.1.5 The Bidder is to provide details on how its proposed solution will assist the DSD with the vision of integrating databases to improve data sharing, system availability, stability and performance.
- 5.1.6 The bidder must list the value the proposed solution can deliver to the DSD.
- 5.1.7 List all capabilities and functionality available through the proposed solution.
- 5.1.8 Be able to pull and push information.
- 5.1.9 Support any technology.
- 5.1.10 Analysis. Bidder will be expected to perform a full analysis of the environment and will be required to provide a detailed User Requirement Specification (URS) as well as Functional Requirement Specification (FRS). These requirements will be used in order to perform requirements analysis as well Key Performance Indicators (KPIs) for the success of the total project.
- 5.1.11 Attribute Based Management.
- 5.1.12 Agent Based Management. The convergence tool will have the ability to connect to agents on specific systems in order to report on specified metrics.

- 5.1.13 Agentless Management. The convergence tool will have the ability to collect and report on systems (where applicable) without installing agents for the system.
- 5.1.14 It is also envisioned that the the tool will work across security boundaries (such Active Directory (AD) forests and domains) in order to collect and report on metrics for systems that are outside the control of National DSD. This is a critical function for reporting on provincial systems.
- 5.1.15 Custom Thresholds. The tool should have the ability to create custom thresholds to be used for raising alerts based on data sharing.
- 5.1.16 Reporting. It is envisioned that the tool will have out-of-the-box reports available, custom reports must all be available for administrators of the system to generate specific reports as and when required.
- 5.1.17 Security. The tool must be secure, and must have full Role Based Access Controls (RBACs) available out-of-the-box. The ability to create custom roles is seen as mandatory requirement.
- 5.1.18 Knowledge Transfer. It is envisioned that a successful bidder will ensure that identified departmental administrators are provided with the necessary skills and knowledge to perform common day-to-day activities. Knowledge transfer will occur during the implementation of the tool within the DSD environment. Knowledge transfer will occur on an informal manner and must not be confused with the formal training addressed latter in this document.
- 5.1.19 Training. A successful bidder will include formal training for 5 (five) identified DSD Administrative users. This training will be Instructor Led Training (ILT) and will be provided by a suitably qualified training institution. Where applicable a bidder will provide a list of qualifications that can be achieved for the tool and up to what level a DSD administrator will be trained.

5.1.20 DSD will at all times retain ownership of all proprietary rights in relation to data. Data must at all times be hosted within the infrastructure of DSD and never at any point must DSD data be hosted out of the borders of RSA.
